Summary

MCA Candidate (2026 | CGPA 8.7) | Full-Stack & AI/ML Developer

Engineered full-stack and AI/ML systems using React, TypeScript, Flutter, Python, FastAPI, Node.js, Java, Spring MVC, SQL/NoSQL databases, REST APIs, and Git workflows. Experienced in responsive UI, backend API development and integration, authentication, debugging, testing, deployment, and ML/LLM-powered features including NLP, RAG, forecasting, and anomaly detection. Practical foundation in DSA, System Design, and backend development; seeking Software Development Engineer, Full-Stack Developer, or AI/ML Engineer roles.

Education

Master of Computer Applications (MCA)

KLE Technological University, Hubli, Karnataka

Expected 09/2026

CGPA: 8.7/10

Bachelor of Computer Applications (BCA)

Karnatak University, Karnataka

09/2024

CGPA: 9.24/10 (6th Sem SGPA: 9.63)

Experience

Software Development Intern

05/2026 - Present

IonIdea Interactive Pvt. Ltd., Bangalore, Karnataka

- Owning and delivering full-stack academic attainment modules in IonCUDOS ERP using React, TypeScript, FastAPI, REST APIs, and MariaDB, including frontend implementation, backend API development, cascading filters, calculation flows, API integration, debugging, testing, and mentor-reviewed delivery.

Full-Stack AI Project Lead

07/2025

Infosys Tech for Good Hackathon (Team Lead)

- Led a team of 5 and architected *DigiDisha*, an AI-powered rural skilling platform, end-to-end in 48 hours competing against 200+ national teams.
- Built an NLP-based job-matching pipeline and AI aptitude engine; secured credentials using SHA-256-based hashing with Firebase Authentication.

Web Development Intern

04/2024 - 06/2024

Ultimez Technology Pvt. Ltd., Hubli, Karnataka

- Developed and deployed a production-ready responsive web app using HTML5, CSS3, and JavaScript, ensuring cross-browser compatibility.
- Streamlined deployments using Git workflows and Vercel CI/CD; optimized front-end assets to improve page load speed and performance.

Projects

Inverse - AI-Powered Energy Intelligence Platform [\[Live App\]](#) | [\[Demo Video\]](#) | [\[GitHub Repo\]](#) 12/2025 - 01/2026

FastAPI, React, TypeScript, Tailwind CSS, XGBoost, Isolation Forest, JWT, SendGrid API, Docker, SQLite, Render, Vercel

- Built and deployed a full-stack energy analytics platform serving appliance-level regression for 5 categories; secured with JWT and OTP, containerized with Docker, deployed on Render and Vercel.
- Trained an XGBoost regression model achieving $R^2 = 0.997$ on a time-based holdout split; implemented rolling time-series validation, recursive 7-day forecasting, and a What-If Cost Simulator for slab-tariff projection.
- Engineered an anomaly detection pipeline (Isolation Forest + rule-based fallback); built an LLM-powered NLP pipeline using Llama 3.3 via Groq API with RAG-lite context injection for multilingual, data-grounded energy queries.
- Authored a research paper on the system covering predictive analytics, anomaly detection, experimentation workflows, evaluation metrics, and scalable energy intelligence architecture.

DarkSky Observation System | *Java, Spring MVC, MySQL, JSP, Maven, JDBC, Servlet*

02/2026

- Developed a full-stack Spring MVC web app with layered Controller-Service-DAO architecture, normalized MySQL schema, JDBC persistence, role-based access control, and AOP logging.

KLEver - Smart Canteen Automation System | *PHP, MySQL, JavaScript, AJAX, Razorpay API* | 07/2025 - 09/2025

- Engineered a secure PHP/MySQL canteen management platform serving 200+ daily users; integrated Razorpay payment gateway, implemented AJAX-powered real-time order tracking, and built admin dashboards with analytics pipelines improving throughput and order visibility by 40%.

Skills

Languages: Java, Python, JavaScript, TypeScript, PHP, SQL, C

Frontend: React, Next.js, Tailwind CSS, Flutter, Mobile App Development, HTML5, CSS3, Vite, Responsive UI

Backend & APIs: FastAPI, Node.js, Express.js, Spring Boot, Spring MVC, RESTful APIs, API Development, API Integration, JWT Authentication, Servlet, JSP, Razorpay API, SendGrid API

Machine Learning / AI: Prompt Engineering, NLP with GenAI, LLM Integration, RAG, BERT, XGBoost, Isolation Forest, Random Forest, Time-Series Forecasting

Databases: MongoDB, MySQL, MariaDB, SQLite, Firebase

Testing & Tools: Manual Testing, API Testing, End-to-End Testing, Postman, Docker, Git, GitHub, Vercel, Railway, Render, VS Code, Linux OS & Command-Line Tools

Concepts: Data Structures & Algorithms, OOP, System Design, OS, DBMS, Computer Networks (TCP/IP, DNS, HTTP), Multithreading & Concurrency, Cloud Computing, Agile

Achievements

- **Topper of the Year** - BCA 5th Sem (SGPA 9.58); Subject Topper - Web CMS (98/100) & Digital Marketing (100/100).
- **Best Girl Award** and 30+ academic & sports accolades across school and university levels.
- **Inter-collegiate: 1st Place** - Elocution & Pick and Speak and **2nd Place** - Essay, Book Review & Speech.
- Elected **Ladies' Representative** (BCA) and **Sports Minister** (High School).
